WORK EXPERIENCE

CROISSANT - Lead Engineer, Apps

July 2022 -- Present | Philadelphia, PA

Fintech startup building a consumer platform that helps shoppers track and resell their purchases through integrated commerce and payment experiences.

- Founding engineer, owned the frontend architecture and technical strategy across web and mobile applications
 - Scaffolded a monorepo for all frontend customer-facing apps; Made the decision to use Next Js, React Native and Plasmio in order to facilitate agility and cross-collaboration among engineers across all applications
- Architect and build the company's flagship customer application, the Croissant mobile app, from the ground up
 - Created scalable application architecture, including decision making for navigation patterns and state management
 - Features built in collaboration with backend and product include: Collection management and sell flows, Social feed, Home dashboard, Notifications, Subscription purchasing and management, Third party integrations (Gmail, Paypal)
- Designed and built a cross-platform Design System in partnership with design team
 - Created custom component libraries with over 50 React and Web components across applications
 - Built a shared token system across React and React Native applications using Style Dictionary
 - Defined and wrote out branding skill files to guide frontend AI build
- Translated high-level product concepts into polished customer experiences by owning UX, UI, and implementation from concept through release.
 - Full design and re-build of v3 of the mobile app, using design best practices to improve user journeys in the app

GURU - UI Engineer II

Nov 2021 -- July 2022 | Philadelphia, PA

Enterprise SaaS startup developing a knowledge management platform that helps teams share institutional knowledge.

- Developed customer-facing features in a fast-paced agile environment.
- Maintained and expanded a shared design system with a focus on accessibility and consistency.

CREDITLY - Software Engineer

March 2020 -- Nov 2021 | Philadelphia, PA

Early-stage fintech startup building digital lending solutions.

- Built reusable UI components and product features for a React application.
- Led implementation of internationalization and accessibility standards across the application.
- Used customer research and analytics to improve product usability and presented new features to executive leadership.
